Well No. **# 2** is located **330** ft. from **[N]** line and **1980** ft. from **[E]** line of sec. **29**  
**C NW NE** **20 S., 24 E., SALT LAKE**  
**UNNAMED** **GRAND** **UTAH**  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **4502** ft.

**CC-2-UOGCC**

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

**10" surface casing will be set so that at least one Full Joint is in the Mancos Formation. Casing will be set and cemented with a cement return to the surface.**  
**8" casing will then be carried through the Dakota to control seeping and any water from the Dakota, from that point we will then drill a 7" hole to the top of the Brushy Basin Sand in the Morrison, and if productive will pull the 8" casing and set 7" casing cementing from total depth to at least 40' above the Dakota Formation.**  
**Will then complete the well open hole.**

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Attn: Donald Bowles, Secretary

Gentlemen:

This is to acknowledge receipt of your notice of intention to drill Well No. Federal #2, which is to be located 330 feet from the north line and 1980 feet from the east line of Section 29, Township 20 South, Range 24 East, S1EM, Grand County, Utah.

Please be advised that insofar as this office is concerned approval to drill said well is hereby granted in accordance with the Order issued in Cause #2 on June 28, 1956; however, this approval is subject to the following conditions:

1. That a Plat be furnished this office.
2. This office is to be notified at least 24 hours before the following operations are begun so we may witness such operations:
  - a. Running and cementing of surface casing;
  - b. Running and cementing of production casing; or
  - c. Setting of cement plugs if the well is to be abandoned.

Notification of the above operations shall be given to one of the following named individuals:

Intermountain Petroleum Company

cc - U.O.G.C.C.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

58' of 10 3/4" surface casing was set with 17 sacks of cement with cement returns to the surface.

Waited on cement 30 hours. Cleaned out hole, Ran Bailer, no leaks. Drilled ahead, hit gas blow in Dakota, shut in gas, poured water around casing, no leaks

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Memo For Filing

Re: Intermountain Pet. Co.  
Federal #2  
Sec. 29, T. 20 S., R. 24 E.,  
Grand County

Jack Horton, Geologist for Intermountain Petroleum Company, phoned on 6-14-61 and requested permission to plug back this well as follows:

10 sx. @ TD (930)  
20 sx. from 720' to approx. 620'  
12 sx - 510' to 530'

He proposed to pull the 7" casing up to 470', dump several sacks of cal-seal in the bottom of the pipe, drill out and test the Dakota at about 500'. If the cal-seal did not hold, he would cement the 7" at 470' with 10 sx. and then test. If the test proved commercial, he would perforate the casing and squeeze with an additional 20 sx.

We approved this program when Mr. Horton stated that Don Russell had already approved it; however, upon checking with Don Russell, it was determined that the USGS had required a 20 sx. plug at TD rather than the 10 sx. Mr. Horton specified.

Don R. attempted to contact Horton again requesting the 20 sx. plug, but was not able to do so. I phoned Harvey and asked him to visit the well and make sure the plug at TD consisted of 20 sx.

When Harvey got to the location on 6-15-61 (A.M.), the operator had set only 10 sx. and was filling the hole with mud. They had set the plug with two 5 sx. batches and had waited for 24 hours on each, so they had evidently begun plugging operations before getting approval of the USGS or the Commission. Harvey required them to bail out the mud and will require setting of the additional 10 sx. at TD. Don Russell was informed of this action and was in agreement with it.

ROBERT L. SCHMIDT  
CHIEF PETROLEUM ENGINEER

RLS:kpB

Memo For Filing

Re: Intermountain Pet. Co.  
Federal #2  
Sec. 29, T. 20 S., R. 24 E.,  
Grand County

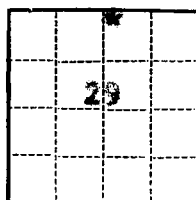

Harvey called at about 2:30 P.M. on 6-16-61 to state that the operator desired to change the plug-back program as follows:

*Existing* ~~Plug~~ - 20 sx. at TD.  
Proposed program - Pull 7" pipe and install guide shoe, rerun 7" casing and cement at 710' with sufficient cement to rise to 450' (top of Dakota at 480').

Don Russell was in the office when Harvey called and he and I approved this program and told Harvey to so advise the operator. I then called Don Boles and gave him verbal approval. He will call Colorado Cementers and have them do the job.

The elevation of the derrick floor above sea level is 4322 ft.

GC-2-USOGCC

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth 925'. 10 sacks of cement were spotted on bottom.  
Hole was filled with mud to 720'.  
7" O.D. 26 lb. new black oil well casing was cemented from 710' to 433' with 75 sacks of cement.  
Casing was perforated from 681' to 686' with 4 shots per foot.  
After shooting gas blew for a short time, and was followed by water. This zone was then plugged with 12 sacks of cement.  
Will move small testing rig on well to test upper zone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Gentlemen:

On June 14, 1961, we granted you verbal approval to plug back and test the subject well. You subsequently reported this work was accomplished on a Sundry Notice dated June 26, 1961. We have received no further notices regarding work on this well and have not received Monthly Report of Operations since May, 1961.

Would you please file Sundry Notices covering any additional work done, and Monthly Reports covering the period from June, 1961 to the present. If work has been suspended on this well, please advise the reason for such and the estimated date operations will again be commenced.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

Gentlemen:

We note that you have not filed a monthly report of operations on the subject well since May, 1961 at which time you reported said well was drilling below 700'. We have received a copy of the USGS Form 9-331a, "Sundry Notices and Reports on Wells" dated July 26, 1961, that you run 7" casing, cemented from 710' to 433', had perforated this casing, plugged the perforated zone, and intended to test the upper zone.

Would you please advise us of the current status of this well and submit the necessary monthly reports covering the time interval from June, 1961 to present.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

Gentlemen:

Our records indicate that you have not filed a Monthly Report of Operations for the months of June and July, 1962 for the subject well. Rule C-22 (1) of the General Rules and Regulations and Rules of Practice and Procedure, State of Utah Oil & Gas Conservation Commission, require that said report be filed on or before the sixteenth (16) day of the succeeding month. This report may be filed on Form OGCC-4, "Report of Operations and Well Status Report", on Company Forms containing substantially the same information, or on U. S. Geological Survey Form 9-329, "Lessee's Monthly Report of Operation". We are enclosing copies of Form OGCC-4 for your convenience.

Your early attention to this matter will be greatly appreciated.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

Grand County, Utah

Dear Dude:

We have written several letters to the Intermountain Petroleum Company requesting the Monthly Report of Operations for the months of October, 1962 through April, 1963 for the above mentioned well.

Could you please help us to obtain these reports so that we may bring our file on this well up to date. If you can't help us, let me know and I'll turn this matter over to the Attorney General.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

The elevation of the derrick floor above sea level is **4502** ft. **CC-2-US00CC**

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

**Total Depth of Well is 925'. 10 sack plug on bottom**  
**7" casing was cemented from 710' to 433'**  
**approximately 400 feet of casing might be recovered.**

**DETAILS**

**Will place 25 sack plug at stub of casing and up to where casing parts.**  
**Fill with mud to 70 feet**  
**20 sack plug to 10 3/4" casing**  
**8-10 Sack plug at surface to hold marker**  
**Marker: 4" marker 4' high Imbedded 6' in plug in cement**

Re: Well No. Federal #2  
Sec. 29, T. 20 S., R. 24 E.,  
Grand County, Utah

Gentlemen:

This letter is to advise you that the well log for the above mentioned well is due and has not been filed with this office as required by our rules and regulations.

Please complete and return the enclosed Form OGCC-3, "Well Completion or ReCompletion Report and Log", in duplicate and forward them to this office as soon as possible.

Although we realize you only drilled this well to 925' you probably did not run electric and/or radioactivity logs. However, we would like a statement to that effect in order to keep our records accurate and complete.

Thank you for your consideration in this request.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

CLARELLA N. PECK  
RECORDS CLERK

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

1964  
Apr. 29: Moved in Utah-New Mexico Casing Pullers Rig (Charles McConkie, Vernal Utah)  
Rigged up.

Apr 30: Took strain on 7" casing (45,000 lbs) Pulled of nipple which had been welded onto protector. Dug cellar, out off surface pipe 3 feet down to get hold of 7" casing. Worked pipe a couple of times to get free point. Shot pipe off at 415 feet. Pulled casing out of hole. Filled hole with mud to 430 feet. Rigged down pulling unit and rigged up cementing equipment.

May 1 Pumped 25 sx cement over stop of casing from 430 ft. to 370 ft. Filled hole with mud to 100 feet. Cemented with 25 sx over bottom of surface filled hole with mud to 10 feet and installed regulation marker in 15 sx cement. Cleaned location and smoothed it off with drag.

\* All work done by Charles McConkie Vernal Utah, under direction of Mr. Harvey Counts of Moab.

18. I hereby certify that the foregoing is true and correct
